Profiles

LinkedIn

GitHub

Skills

Languages

Javascript/Typescript, HTML, CSS, Python, Core Java

Libraries/Frameworks

React.js, NextJS, Express, NestJS, Django, Langgraph, Langchain, Redux, RTK, MaterialUI, tailwind

Tools

Git, Jenkins, Docker, JIRA, Kubernetes, Jupyter Notebook

Certifications

Deeplearning Specialization

DEC 24, 2018

Coursera - deeplearning.ai

- Neural Networks and Deep Learning
- Convolutional Neural Networks
- Sequence Models
- Structuring Machine Learning Projects
- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization.
- Utilized Numpy, Pandas, Scikit learn, Tensorflow , Keras, Plotly, etc libraries.

Retrieval Augmented Generation (RAG)

FEB 14, 2026

Coursera - Deeplearning.ai

- design and build RAG systems tailored to real-world needs
- weigh tradeoffs between cost, speed, and quality to choose the right techniques for each component of a RAG system
- A foundational framework to adapt RAG systems as new tools and methods emerge

Innovative Full-stack Developer with 9 years of experience in building impactful and user-friendly websites and applications. Specializes in **React, NodeJs, Redux, Python, FastAPI, Postgres, Langchain - LangGraph, MultiAgents as well as Deeplearning specialization with Tensorflow, Keras and Python-Numpy, Pandas** and for orchestration using **Jenkins,LXC as well as Kubernetes, Terraform, Docker** and cutting-edge development techniques. Proven track record of leading successful projects from concept to deployment.

Experience

Frontrol Inc — Pune, India (remote)

Senior Software Engineer — JUN 2023 to Present

- Spearheaded the development of SAAS webapplication
- Developed and implemented a new responsive framework, with rich data presentation
- Mentored a team of four junior developers, fostering a culture of technical excellence.
- Created langgraph workflows for our SAAS app and integrated AI at granular level for intelligence at all levels in the saas app.
- Reviewed PRs, overseen application development and track JIRA sprints for all development work.
- Implemented MCP for various Schemas for integration with various frontier AI tools

Arab Bank (ACABES International) — Dubai UAE (remote), Kochi India (remote)

Senior Software Engineer — DEC 2020 - MAY 2023

Tech stack: HTML, CSS, Javascript, React, MaterialUI, APIGEE, Springboot, JAVA, MongoDB, Express, NodeJs

- Worked on various SME banking and customer portal, Retail Banking portal, Card management, Onboarding and Payment Gateways websites.
- Collaborated and guided a team of 15-20 to develop high-quality web applications using React.js and Node.js.
- Review and grow the team development work from scratch to boost organization growth at large scale

Zeus Systems Pvt Ltd — Mumbai, India

Software Engineer -> Senior SE -> Module Lead — JUN 2016 - DEC 2020

Tech stack: HTML5, CSS3, Javascript, Script#, React, PostgreSQL, MySQL, MongoDB, Express, NodeJs

- Develop and maintain LMS(Learning Management Systems) and CMS (Content Management Systems) for clients such as Discovery Education and Cengage.
- Create TEIs for educational web applications such as MacGrow Hills and Discovery Education.
- Use strong communication skills and ability to work with clients and backend developers to create a user-friendly and visually appealing experience for the user.
- Deliver the development of scalable, high-performance testing framework for testing of web application covering 3lac test cases using Selenium, Java and TestNG using Jenkins.

Education

Darshan Institute of Engineering and Technology (GTU) — Bachelor's in Computer Engineering

Rajkot, Gujarat — JUN 2012 to MAY 2016

https://darshan.ac.in

Projects

GPSC Gamify

Developed e-learning platform helping State PSC candidates to clear concepts and remember facts using auto generated Skill cards with importance and difficulty scores to identify weak sections and help students cover all topics of subjects with ease and easy tracking of their learning journey.

Org Dashboard

Created an interactive analytics dashboard architecture and development for a SaaS application, enhancing data visualization for clients. Implemented automated suggestion of widgets using AI with MCP

E-Commerce Platform

- Spearheaded fullstack development of an E-Commerce platform aiming to solve client's specific marketplace needs.
- Used PayloadCMS for easy handling of inventory.
- added role based access to inventory, publishing, content management etc in Payload CMS.
